

Please try to do following steps:

1. CHECK THE TIME ZONE settings (for correct saved settings must be correct time zone set)

MAIN | ADMINISTRATIVE SETTINGS | REPORTS

DORO (0 RUR) | LOGOUT

INFO | MAP | **SETTINGS**

BASIC | GROUPS | USERS | NOTIFICATIONS | **CONNECTION** | SENSORS | ENGINE START | HEATING | FUEL | PARAMETERS | DRIVERS

Data transfer to the server

At alert event only when armed ☒ Connection to p-on.ru server is established every time an event is recorded (arming/disarming, alarm activation, including sensor's warning zones). To save funds you may restrict connections to alarm events only.

Operation in roaming service GSM-notifications when in roaming service ☒ Enable transmitting system telemetry, event history etc. when using GPRS connection in roaming service

When restoring connection If GSM signal is lost ☒ Transmitting system telemetry, event history etc. when GSM connection is lost for a long time.

Constant connection ☒

Connection periodicity Time period through which the connection is established 0 h 24 h

Timezone Relative to UTC **+2 h** -12 h +13

The system verifies it's time via GPS in UTC format. For it to correctly display local time, time zone shift should be specified

2. Uninstall pandora app from all cell phones

3. Erase all conected devices on pandora-on.com
